

SOLVING THE WORLD'S TOUGHEST CUTTING CHALLENGES

ENDURANCE IS EVERYTHING

Since 1984, Jet Edge has been designing and manufacturing ultra-high-pressure waterjet technology that doesn't back down.

HARDWORKING

At Jet Edge, we capture the can-do spirit of dedicated, dependable workers in every machine we build.

BUILT TO LAST

Our systems are suited for high-volume, heavy-duty applications. We incorporate rock-solid designs that are packed with power.

CUSTOMIZABLE

Our pumps, gantries, and accessories are highly configurable to your specific cutting needs.

OUR STORY

Jet Edge has been at the forefront of designing and manufacturing ultra-high-pressure waterjet pumps and motion systems since the technology came on-line for industrial applications. We take our unique client relationships seriously and are committed to providing configuration solutions that optimize your specific cutting applications in the environment you work in.

Our systems are especially suited for heavy-duty, high-volume applications where speed and accuracy combine to meet your production and customer goals. Our blue collar approach to durability means 24-hour shifts and lights-out weekend cutting are normal course, delivering equipment that boasts the lowest cost of ownership over the life of the equipment. And since we manufacture both the pump and the motion system, you never get caught between a rock and a hard place with system integration and warranty coverage.

Jet Edge takes great pride in the range of industries our equipment supports. We are involved in steel distribution, industrial manufacturing, automotive and aerospace precision cutting, plastics, rubber, tool and dye production, mining, food, and fabrics along with many more industries. Our willingness to custom-engineer solutions to satisfy specific needs makes us the go-to waterjet technology supplier.

“JET EDGE BRINGS POTENTIAL CUSTOMERS IN HERE AND WE’VE RECOMMENDED JET EDGE TO EVERYBODY THEY’VE BROUGHT IN. THEY HAVE ALWAYS BEEN THERE WHEN WE NEEDED THEM. DOWNTIME HAS BEEN ALMOST NON-EXISTENT. EVERYONE FROM SALES TO SERVICE TO PARTS HAS BEEN EXCELLENT.”
— BRUCE WEEMAN, METFAB MANUFACTURING ENGINEER

If non-stop grit, power, and hard work sound like something that could bring your application the edge it needs, it’s time to get in touch with Jet Edge. We welcome you to contact us or visit our St. Michael, Minnesota facility to explore a Jet Edge solution for your application’s cutting challenges.

The Jet Edge X-5, utilizes a 5-Axis cutting head to cut sophisticated 3D parts. With nearly a foot of vertical travel and a 60 degree bevel, large parts can be contour cut eliminating secondary operations.

Contact Jet Edge for more information and a custom application analysis that is unique to your production goals. We want your Jet Edge machine to be the hardest worker on your team.
